

Business Continuity with eLearning@SP (eSP)

About Singapore Polytechnic

- 1st polytechnic set up in 1954 – over 150000 graduates
- 17000 students enrolled in 80 diploma and post-diploma courses offered by 10 Schools
- Offers a combination of broad based and practice oriented courses, leadership programmes, co-curricular activities and overseas opportunities for a well rounded education.

<http://www.sp.edu.sg>

**SINGAPORE
POLYTECHNIC**

- **SP Scholars programme**
- **SP Outstanding Talent (SPOT) programme**
- **Co-curricular activities**
- **Institutional modules**
- **Local and international competitions**
- **Overseas immersion and internship**
- **Conceive - Design - Implement - Operate (CDIO™)**
- **Multi disciplinary projects**
- **Design Thinking**

Holistic Education

Key drivers for SP Learning Technologies

- Good SPICE infrastructure
 - eSP integrated to other enterprise systems (student admin, digital library, staff/student portals, digital asset management, video streaming)
- Committee for ICT in Teaching & Learning
- eLearning champions
- Innovation in education projects
- Professional Development
- Certification (CITT, CEDAP)
- Special Events – eLearning Weeks, Business Continuity

SP eLearning weeks

SINGAPORE
POLYTECHNIC

Objectives of the eLW exercises

- To provide staff and students with a learning experience that is fully online.
- To test readiness for continuation of learning during crisis situations such as pandemic flu or unforeseen campus closure.
- To test the infrastructure for supporting learning technologies for further IT planning.

eLW implementation

- Target group – all full-time courses only
- One week per semester – campus wide basis
- Prior to eLW
 - Communication to staff (objectives, guidelines, sharing sessions)
 - Staff readiness (design online lessons and activities, develop learning resources, attend trainings)
 - Communication to students (clear instructions, contacting their lecturers)
 - Learner support (publish contact details, availability for teacher-student interaction, help desk),

eLW implementation

- During eLW
 - Ensure good helpdesk support
 - Student learn on their own and submit assessments and discussions thru eSP.
- After eLW
 - Staff conduct lessons that are not possible thru eLW.
 - Post event surveys and focus group discussions
 - Evaluation reports and recommendations

Concurrent usage @ 1 hr intervals

[patterns are quite similar in all 5 eLWs]

Staff Poll on readiness for business continuity (in 2008)

e-Learning Week Poll for staff

SP has already conducted 5 e-Learning Week exercises since Dec 2005. How confident or ready are you now, if the campus were really closed (without due warning) for a prolonged period of time, say 2 weeks? Will you be able to continue your teaching and delivery of learning, off campus?

Student Poll on workload

eLearning WeeK Poll for students

How do you find your combined workload for the e-Learning Week compared to what you would get normally when you attend lessons in SP? Your workload for the scheduled lessons would be the timetabled hours for all lessons, plus additional hours on your homework and other assignments.

Very Light - quite free	113 / 2.94%
Lighter by around 10% to 30% lesser than a normal week	368 / 9.57%
About the same	800 / 20.8%
Heavier by around 10% to 30% more work	1244 / 32.34%
Very heavy - too many assignments & assessments	1322 / 34.36%

Satisfaction survey questions (Student)

Qn 1 The learning activities were interesting.

Qn 2 I can complete my lessons, assignments and tests within the time and resources given to me.

Qn 3 Instructions on what I was required to do were clear and adequate.

Qn 4 I have no problems using my PC/notebook to access my lessons on the web

Qn 5 There was effective communication with my lecturers and classmates to support my learning.

Qn 6 I am satisfied at the level of support provided by the technical support teams.

STUDENT Satisfaction Survey

Chart Date : 5th Dec 2007

Satisfaction survey questions (Staff)

- Qn 1 Sufficient resources were available to effectively implement the planned learning activities.
- Qn 2 There was appropriate information on what I was expected to do.
- Qn 3 The learning outcomes for the week were achieved.
- Qn 4 The students participated actively and positively to the learning activities.
- Qn 5 There was effective communication with students to support their learning.
- Qn 6 I feel competent in designing and managing online learning activities.
- Qn 7 I felt more able to conduct learning outside the campus for an extended period of time

STAFF Satisfaction Survey

Chart Date : 5th Dec 2007

Lessons from the Edge

- Stepping out of the comfort zone (take risks!)
- Greater understanding of e-teaching and e-learning concerns and challenges
- Teacher centric to student centric strategies
- Appropriate affordances in use of learning technologies
- Lesson design and learning activities to be more authentic and built on more e-Pedagogy approaches

Business Continuity

... we stopped eLearning Week exercises since 2008 and allowed Schools to conduct their own ... but then in mid 2009, another episode starts...

The H1N1 flu pandemic in 2009

- BCM plans activated (contact tracing, temperature taking, travel restrictions, etc)
- Preparation for protracted campus closure include the use of eSP for business continuity.
- No Business Continuity plans are available, but from the lessons of the past eLearning Week exercises, the team drafted “eLearning Contingency” plan.

Key elements of the eLearning Contingency plan :

- Communication plans to staff / students including contact info and applications to support student engagement and learning.
- Weekly learning plans to ensure proper spread of learning load, co-ordination of lessons delivery and submissions of assessments.
- Checklists for pre-closure, home based learning (HBL) and post closure (curriculum recovery)
- Must make use of Bb module sites

E-learning Contingency Plan

H1NI (A) Campus Closure
eLearning Contingency Plan

- All lessons to be conducted as e-Learning using Blackboard LMS.
- Module co-ordinators to ensure that their Bb module site is ready for e-Learning outside campus. They should concentrate on learning activities, formative assessments and tasks that can engage the students online.
- Each Bb module site to have
 - 1) Updated contact information and support schedule.
 - 2) An enhanced module map to be placed in the Learning Resources area
 - 3) Announcements that give clear instructions on activities to be carried out during the closure
- Schools to ensure that their licensed software are compatible and available for access outside campus, and to arrange with CIS on VPN and licensing requirements.
- CMTs to plan for post-closure activities such as practical work and summative assessments that cannot be conducted during a closure

BEFORE closure

Campus Closed

E-learning Contingency Plan

Campus Closed

- Support Teams activated
- eSP Support team to put up announcements, manage hotline and support staff/student helpdesk.
- CIS Support team to manage network, bandwidth and support technical issues of eSP infrastructure
- School support teams to manage module related matters

Home Based Learning

-
- EDU and CIS to play support role.

Campus Reopened

- Practical work and sum... planned.
- Have students go thro... complete the prescribed studies with minimum delay

Recovery

BEFORE – module preparation

- Module Learning Resources
 - Enhanced for out-of-classroom learning (eg. Narrated slides, flash video)
 - Encourage use of free learning apps, social media
 - Standard module layout and organisation

SINGAPORE
POLYTECHNIC

A typical module site will include :

1. **Announcements** or notices posted by your lecturer.
2. Staff Information – contact and availability
3. Module Map (lesson schedule, assessment and learning activities) within **Module Information**
4. **Learning Resources** (slides, videos, additional readings, assignments, tests and quizzes)
5. **Library Resources**
6. **Groups** that allow you to discuss and collaborate with your classmates

The screenshot shows the eLearning@SP interface for the module ET0802: PRINCIPLES OF ELECTRICAL & ELECTRONIC ENGINEERING. The top navigation bar includes links for Home, Help, Logout, My SP, Guides, My Modules, My Contents, My Community, CDIO, Prof Devt, Blog, and Scholar. A left sidebar contains buttons for Announcements, Staff Information, Module Information, Learning Resources, Library Resources, Discussion Board, and Groups, along with a Tools section for Course Tools, Course Map, Refresh, and Detail View. The main content area features a large blue banner with the text "Welcome to Principles of Electrical and Electronic Engineering" and a subtitle "a module that begins the journey with you to the fascinating world of electrical and electronic engineering". Below the banner, there are tabs for "VIEW TODAY", "VIEW LAST 7 DAYS", "VIEW LAST 30 DAYS", and "VIEW ALL". The current view shows two announcements from January 07, 2010 - January 14, 2010. The first announcement, dated Mon, Jan 11, 2010, is titled "Errors or missing info in Op amp chapter and RL chapter" and mentions errors in Chapter 23 and missing information in Chapter 16. The second announcement, dated Fri, Jan 08, 2010, is titled "Simulation Circuits for Expt 17" and states that users can go to Week 12 (sem 2) under "Learning Resources" to perform op amp circuit simulation activities.

DURING – Home Based Learning

- Learner support through School teaching teams
- Helpdesk and technical support by eSP
- Ensure network and bandwidth are well managed.
- Use of social media, Web 2.0 and live conferencing tools
- Less emphasis on assessment outcomes
- Design lessons that result in less traffic on LMS

AFTER – Recovery phase

- Catch up on practicals and studio based lessons
- Affected students to complete the rest of course with minimum delay.
- Summative assessments may need to be re-designed taking into account the closure periods and type of home-based learning.
- Conduct reviews of HBL action plans

A “3 weeks campus closure” scenario

- Briefings to all School mgt and staff using a Week 1

Bb module sites are HBL ready with enhanced learning materials, formative assessments and self-learning activities, supported by basic communication and collaboration tools.

Week 2

Add on the use of Web 2.0, social media tools, etc for higher order interaction and student engagement.

Week 3

Add on the use of live conferencing / virtual classroom tools to emulate classroom delivery and exchange.

Thu, May 07, 2009 -- **MUST READ - Module Instruction during School Closure**

Dear Students,

To support your learning while we are off campus, I have organized activities and resources for you to keep up-to-date with the module schedule.

Start by accessing 'Learning Topics/Learning Outcomes' – this will guide you through the full range of resources provided, what activities/assignments you need to do, and how to check that you have met the learning objectives.

If you have any questions or need clarification on what you have to learn and how, please [contact me](#) and/or participate in the [Forum Discussion](#)

Dear Students,

HONG EDU

During this period, from ~~ddmmyyyy~~ to ~~ddmmyyyy~~, please keep up with the following tasks:

Week 1

Learning Topics/ Learning Outcomes	Tutorials & CAs	Learning Resources
Please click and read Topic 4: High Level (HL) GUI (with voice narration)	Complete your Tutorial 4 and upload your answers for Q5 and Q6 through this link by end of Week 1 .	Additional Reading Materials: Programming in JME
4.1 List all the HL GUI in JME.	Test your understanding on Topic 4 with the Self-Assessment	If you have any questions or need any clarifications, please participate in the Forum Discussion
4.2 Develop a simple game with HL GUI.

Types of evaluation

00:07:01 / 01:00:15 /

Types of Evaluation

There are 2 main types of evaluations:

- Formative or continuous evaluations
- Summative or end-of-program evaluations

Each of them have different purposes.
Let's find out more about these 2 types of evaluations.....

Future plans

After the H1N1 episode ...

- Schools to develop HBL action plans not just for 3 weeks, but for entire semester
- Evaluate staff competencies and develop professional development programmes for faculty, mgt and support staff
- Develop a Learning Technology roadmap, in line with SP strategic thrusts : holistic education, global orientation, building capabilities and creating learning/social spaces.

THANK YOU
