Use of Electronic Health Documentation to Enhance Accuracy in Documentation

Cris Tenebroso

Institute of Technical Education
Absence of EHD in the Pedagogy

CURRENT APPROACH

Costly software
Costly Computer Hardware
Lack accessibility
AIMED AT

Integration of Healthcare Informatics

Effective student’s learning

Impact in the delivery of care
Looking back

Lack of confidence
Limited Access
Difficulty integrating paper based
Longer time in entering patient data
Staff has no sufficient time to facilitate
Develop an EHD

- Custom built --
- Easy to use --
- Similar function --
- Cost effective --
Developed a Customized EHD
Comparative analysis

- Paper based documentation
- Electronic health documentation
Preparedness in Using EHD
secured sharing of electronic information

complete and accurate documentation

quick access on patient record

reduced medication error and reliable transcriptions
Conclusion
CHALLENGE

ADAPT

CHANGE
